

Our aim is to develop a positive culture of deep understanding, confidence and competence in maths that produces strong, secure learning. This will help our children grow into confident mathematicians that can explain their thinking with diagrams and calculations.

At Phoenix, we desire that our pupils are passionate, confident and fluent mathematicians equipped to solve a range of problems. Our pupils thrive on challenge and Mastery is evident in our engaging Maths lessons across the school. Key concepts are skilfully delivered ensuring that every child has deep understanding and can succeed. We believe that unlocking mathematical fluency is an essential life skill for all learners and is a prerequisite to being able to reason and solve problems mathematically.

Our high-quality Maths lessons are part of a carefully tailored sequential unit of work. From using White Rose as a base, this ensures the lessons have sufficient breadth and depth to prevent moving too quickly. Teachers ensure their lessons develop pupils' understanding by using the concrete, pictorial and abstract progressions
