

PE and Sport Premium 2022-2023

Items	Cost
Transport to inter school competitions	£2500.00
Transport subsidy for Swimming	£3000.00
Field and MUGA Maintenance and marking out	£1500.00
Daily Lunchtime Sports Club (Boxing, Football, Hockey)	£2000.00
Whole School Sports Celebration Week	£6000.00
New equipment for Table Tennis/Mats/stamina	£3500.00
Training of staff in Beam and Fizzy for Inclusion	£600.00
Upskilling staff in Dance	£500.00
Training Coaches to Swimming accreditation	£300.00 (2x£150)
Total	£19,900.00

At Phoenix Primary School we are using our PE premium money towards ensuring:

- All children benefit regardless of sporting ability
- Children are given the opportunity to compete in tournaments with other schools
- Staff have access to training opportunities and CPD
- Some activities may be subsidised so that pupils do not miss out through financial constraints
- We make use of collaborative and partnership working

Sports clubs

We run free after-school sports clubs every day at Phoenix on a weekly basis, which include: Football, Basketball, Athletics, Cricket, Netball, Boxing and Fitness Games. Some of sports-specific clubs are held at Medway Park Leisure Centre, which gives us access to high-quality sports facilities, as space can be limited at Phoenix for practice of some sports. We have forged good relations with Chatham Town FC, Gillingham FC, Olympia Boxing, Holcombe Town hockey, Soar trampoline and starting up relations with Medway Dragons rugby club and Medway badminton association.

Friday	Science Club Y5&6 20/12	Football Y3&4 20/9	Computer Club EYFS/Y1/Y2 20/7		

Pupil numbers are highlighted in green, Pupil Premium children are highlighted in red

At lunchtimes (apart from Tuesday) there are sports activities run by the PE Coach on the MUGA. On Tuesday Olympia Boxing run a Boxercise Class throughout lunchtime.

The clubs have given the children the opportunity to practice these sports more in depth, with more of a focus on the technical side of the games, as well as improving the basic skills required to play the sports.

Phoenix has one full time PE teacher, and a PE Assistant employed this year. Therefore, the children will receive outstanding coaching and are involved more throughout the sessions as the ratio of teaching staff to children is better.

Children that have attended sports clubs on a regular basis have developed into team players that represent the school at the Mini Youth Games. Most recently the badminton team finished 4th from 21 teams, the basketball team placed 6th out of 46 teams, in Hockey the team finished 20th from 42 teams, mixed Football we finished 18th from 38 teams and in girls' football we finished an excellent 8th from 20 teams.

The school has been able to purchase and replace sports equipment of excellent quality, which is more durable and enjoyable to use. We have a variety of equipment for every sport that we practice at Phoenix, so children can experience a wide variety of sports and choose those that most interest them. The structure of after school clubs is constantly developing which is increasing the effectiveness of the time we have, that will in time, allow the school to constantly improve at the Mini Youth Games and raise the children's ability in P.E and improve their attainment and fitness levels.

To encourage physical activity during the day we also have the children carrying out the daily mile (if it is inclement weather children use online exercise routines in class). To encourage good mental health staff are trained in Mindfulness (through a Trust initiative) which they use their discretion when to use throughout the day.

We have joined the Greenacre Sport Partnership, with whom we are developing all round skills and our teachers are receiving support in enveloping these in their teaching.

We do not discriminate between those who may have physical or other needs and we aim to include all children in PE lessons and clubs. Staff are trained and briefed in any training for Fizzy or Beam programmes by the Inclusions Manager.

Swimming lessons are compulsory in Year 4 and it is the intention that the vast majority will be competent and comfortable swimmers by the end of the year (at the start of term 1 we had 14 recorded swimmers this has risen to 45 by the end of Term 6) last recorded in 2022.

Sports Equipment

Basketball stands and nets.

These were brought in to allow more flexibility and adjustability for height our previous hoops and nets were fixed the exterior walls. Skills such as shooting, and dribbling are practiced and improved. This has increased the attendance to clubs to 20 and we run the clubs inside and outside.

Badminton Nets and rackets.

The school had no provision for Badminton, this is a new sport that the children enjoy. To experience this in a larger setting the children are using the facilities at Fort Pitt and Medway Park. This is a new popular club and activity and has seen the numbers attending rise to 20 with a waiting list.

Footballs and goals.

All the footballs we had were one size and in poor condition, these have been replaced with appropriate sizes for their ages. We have also purchased portable goals posts and nets to improve accuracy and play on the playground.

Football has always been popular; however, we are seeing more children an increase in club attendance to 40, which we need to rotate on a termly basis.

Active Walls

We have two interactive touch walls to help with co-ordination, increase brain activity and stamina. They also allow solo or dual activities. They are also useful in the support of SEN children.

Hockey and indoor goals

This is a new sport to the school and is again very popular. For the first time we entered the MYG tournament and finished a creditable 20th from 42 teams. The new equipment allows us to practice inside and outside dependent upon weather. We regularly have 20 children across the age range-attending clubs.

Mats

The existing mats are being replaced, which were in a poor state. These are used in Gymnastics and fitness games use these to ensure safety of the children.

Table Tennis

We will be purchasing both internal and external tables for the children to learn and practice the skills and agility needed for this sport.

General fitness equipment (ladders, markers, and hurdles)

With national fitness and wellbeing being so prevalent in our current culture we found it imperative to purchase basic equipment which allowed the children to test themselves physically in ways which not only approved upon vital motor skills but also improved upon overall health and fitness levels.

Since purchasing said equipment and allowing children to use it in warmups, PE, clubs and lunchtime activities we have noticed an improvement in motivation levels, participation in sports and overall fitness in those children who take part on a regular basis. We measure the children's fitness by doing regular beep tests which are compared to previous tests, this has seen a 25% increase in pupil fitness measured over the last year.

As a result of the latest height and weight records taken by the NHS, we have decided to introduce the daily mile for each child to increase fitness and wellbeing while reducing obesity; this is already showing signs of improving attentiveness and concentration in lessons.

Sports Celebration

We are planning our Sporting Celebration for this year to be at our own playing field and inclusive for all year groups and abilities. This will be spread over a week in the summer term and on the final day parents will be allowed to come and enjoy the celebration with their children.

Sports Field Maintenance

There is limited space around the school building, and we are fortunate to have a field a short walking distance from the school. We have developed a MUGA on site to allow all year outside exercise (this cost £60k).

This is vital for us to be able to play various sports, which are needed to have a fulfilling and well-rounded curriculum.

By keeping the field maintained all year and having football and athletics track markings we can allow the children to take part in the various sports needed to develop the children and give them the opportunity to have a fun and positive learning experience whilst doing it.
